An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The title of the invention has been changed to: "System for sensing ambient light having ambient stability probability".

In claims 16, 17 and 18, on line 1, respectively, "system" has been changed to "method".

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a system and its method for sensing ambient light, among other features, comprising a first and a second sensors for providing a first and a second ambient light levels; and a processor for determining a relative intensity change in the measured ambient light levels for each sensor and ambient light stability in response to the change in order to generate filtered first and second ambient light levels. The prior art also fails to teach a computer-readable medium containing a program having instructions for executing: computing a first and a second relative intensity changes for a first and a second ambient light levels from a first and a second sensors; determining an ambient stability probability from the relative intensity changes; adjusting the first and second ambient light levels in response to the ambient stability probability to generate a first and a second filtered ambient light levels. The prior art also fails to teach a system for sensing ambient light, among other features, comprising first and second means for generating a first and a second ambient light signals; and a processing for generating

first and second filtered ambient light signals in response to the probability that at least one of the sensor has experienced a localized ambient light level change.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
